

# The Amazing World of Dinosaurs

*Read the passage below and answer the questions on the next page.*

Dinosaurs were incredible creatures that roamed the Earth millions of years ago. The word "dinosaur" comes from the Greek words meaning "terrible lizard." However, not all dinosaurs were terrible or scary. Some were quite small, not much bigger than a chicken.

Most scientists agree that dinosaurs were diverse in size and shape. The smallest dinosaurs were about the size of a chicken, and the largest, like Argentinosaurus, could reach lengths of up to 100 feet. That's longer than a basketball court!

Many people believe that all dinosaurs were vicious predators. However, this is not entirely true. Some dinosaurs, like the Tyrannosaurus Rex, were carnivorous and hunted for their food. Others, like the Triceratops, were herbivores and ate only plants.

Dinosaurs are fascinating creatures that continue to captivate our imaginations. Even though they are extinct, they are considered one of the greatest wonders of the natural world.

1) What are some facts about dinosaurs mentioned in the passage?

---

---

2. What are some opinions about dinosaurs mentioned in the passage?

---

---
