

Valentine's Day

Read the passage below and answer the questions on the next page.

Valentine's Day is a holiday that is celebrated on February 14th every year. It is a day that is dedicated to expressing love and affection towards others, usually in the form of cards, gifts, or other tokens of appreciation.

The origins of Valentine's Day can be traced back to ancient Rome, where a festival called Lupercalia was held in honor of the god of fertility. During this festival, young men would draw the names of women from a box, and the couple would be paired together for the duration of the festival. This tradition eventually evolved into the modern-day practice of exchanging cards, gifts, and messages of love on Valentine's Day.

Today, Valentine's Day is celebrated all over the world, and it has become a major commercial holiday. Many people exchange cards, flowers, and chocolates with their loved ones on this day, and some couples even go out on special dates or take romantic vacations to celebrate.

Despite its commercialization, Valentine's Day remains an important day for people to express their love and appreciation for one another. It is a day to show gratitude and affection towards those who are important in our lives, and to reaffirm the bonds of love and friendship that bring us closer together. So, it is a very special day for couples and others who want to show their love and appreciation towards their loved ones.

1) On which day of the year is Valentine's Day celebrated?

2) According to the text, what holiday did Valentine's Day derive from?
